

ViperHoist with pneumatic clamping tool for lifting batteries

A ViperHoist60 with a pneumatic clamping tool for lifting batteries up to 60 kg. The tool is operated with controls on the handles, clamping the battery from two sides for vertical lifting. The hoist is equipped with a one handed pistol grip for up/down functions providing flexible and safe operation. Including a CE approved two handed control unit and variable speed control. Clack valves are standard safety features on this tool.

This ViperHoist is mounted on a Lyftman jib crane and used in the packaging area when packing the batteries on to pallets.
